

DEFOAMER PRODUCTS FROM ESTICHEM

Defoamers are required in many formulated aqueous products such as cleaners and metalworking lubricants. The defoamer may be incorporated in the product itself or it may be applied as a tank-side additive during use. Esti Chem Defoamers show good stability in the fluid concentrate and are based on stabilised co-polymer dispersions. They do not contain silicone oils of the type dimethyl siloxane. The correct dosage and application of defoamer has no negative influence on subsequent surface finishing operations such as phosphating and painting.

Defoamer Product Grade	Application area
45	Non-polar to medium polarity aqueous fluids: semi-synthetic metal working fluids, cleaners, & release agents
100 FI	Medium polarity aqueous fluids: semi-synthetic and synthetic metal working fluids, grinding fluids, & cleaners
700	Polar aqueous fluids, grinding fluids, release agents, cleaners, fountain solutions, water-based hydraulic fluids
