

ESTISOL SERIES ESTER FLUIDS

Multisol has worked with Estichem AS for many years to apply vegetable coconut-based esters as solvent replacements and remains in a leading position in the development of new applications & technologies for the future. The Estisol Series are distilled esters for application as replacements for traditional hydrocarbon solvents. They can act as straight replacements, solvency boosters, or carrier fluids in formulated products, e.g. industrial cleaners, degreasers, blanket & roller washes, oilfield chemicals, and printing inks.
