

ESTISURF MICRO EMULSION TECHNOLOGIES

This series of micro emulsion concentrates combine the advantages of alkaline cleaners and solvent based cleaners in a single product. The resulting micro emulsions can be diluted with water and demonstrate excellent wetting and cleaning properties in heavy-duty cleaning operations. This exclusive Esti Chem technology comprises both complete pre-formulated packages, containing Estisol solvents and emulsifier components, along with emulsifier packages for formulating micro emulsions with hydrocarbon solvents. Applications include car cleaning, ink cleaning, & heavy-duty degreasing.

Estisurf Product Grade	Oil phase / Surfactant charge	Product type & application
MF2	Ester, non-ionic, amphoteric	Micro-emulsion concentrate for heavy duty degreasing, non-VOC, with Nordic Swan eco label
AL-PLUS	Ester, non-ionic, anionic	Micro-emulsion concentrate for general heavy duty cleaning of hard surfaces
CM01	Ester, non-ionic, anionic	Micro-emulsion concentrate for heavy duty cleaning including asphalt
M55	Ester, non-ionic, anionic	Micro-emulsion concentrate for removal of waxes, resins, and non-cured polymers
M39	Non-ionic	Surfactant package for formulating micro-emulsions with hydrocarbon solvents
M12	Anionic	Hydrotrope used to control cloud point of micro-emulsions and aqueous solution cleaners
