

## ESTISURF SURFACTANTS FOR WATER SOLUBLE SYSTEMS

The majority of industrial cleaners are based on water soluble components such as surfactants and salts. This branch of the Estisurf product range provides a selection of surface active products for application in cleaner formulations for use in both automatic cleaning devices and manual operations. All products have an excellent environmental profile and find application in industrial cleaning, automotive cleaners, do-it-yourself car care products, institutional cleaners, flexo ink cleaners and others.

| Estisurf Product Grade | Surfactant Type        | Application data                               |
|------------------------|------------------------|--|
| M35                    | Amphoteric / non-ionic | Effective oil remover; good wetting properties |
| A100-40                | Amphoteric             | Wetting agent, a hydrotrope* for non-ionics    |
| GS40                   | Non-ionic              | Hydrotrope for non-ionics                      |
| GS50                   | Non-ionic              | Low foam surfactant and hydrotrope             |
| GS56                   | Non-ionic              | Medium foam surfactant and hydrotrope          |
| GS60                   | Non-ionic              | Medium foam surfactant and hydrotrope          |
| GS70                   | Non-ionic              | Wetting agent, co-emulsifier                   |

\*Hydrotrope: a material that will solubilise a hydrophobic (water hating) material into an aqueous solution
