

Focus On...

Química Multisol Iberica

Multisol Iberica supplies the world's leading multinational oil companies and independent lubricating oil manufacturers with a comprehensive portfolio of specialised fluids and advanced oil additives.

Its product portfolio includes crankcase packages and components, viscosity index modifiers, poly α -olefins & group 3 base oils; as well as high performance refrigeration, food production and heat transfer oils.

Multisol Iberica can offer products from the following major suppliers:

- **ApNano Materials**
Next Generation, high performance lubricant formulations based upon NanoLub™ - the world's first commercial nanotechnology-based solid lubricant.
- **Blackburn Chemicals**
The Dispelair™ range of high performance antifoams, specifically designed for metalworking fluids.
- **Elektrion**
Specialised “electrified” additives for industry.
- **International Fuel Technology**
Multifunctional additive technology for performance & environmental enhancement of fuels & combustables. Includes DiesoLIFT™ BD-3, a top performance additive for addressing fuel stability & deposit control of bio-diesel fuel blends
- **King Industries**
Specialised additives for the lube industry to provide rust prevention & anti-corrosion effects
- **Mitsui Chemicals**
The Lucant™ range of high viscosity synthetic basestocks for use in a wide variety of applications.
- **Oleon**
Oleochemical products, including fatty acid esters and similar products, for application as base fluids for synthetics and biodegradable lubricants.

Multisol Iberica can also offer additional products and dedicated toll manufacture services for lubricant manufacturers in Spain & Portugal through Multisol International Services, based in Sotteville les Rouen, France.

For additional information, or potential sourcing of other lubricant & fuel products, please contact either Romualdo Ricciardelli or Núria Artigas.
