## **Multisol Announce Distribution of Chevron Premium Base Oils in Europe**

Multisol announce that they have been selected by Chevron Belgium N.V, to be the authorised distributor for their Premium base oils in Europe.

Chevron have pioneered modern hydrocracking technology and their proprietary ISODEWAXING® catalytic dewaxing process yields base oils of much superior quality than those produced by conventional solvent extraction processes. Chevron base oils are low in aromatics and contain virtually no sulphur or nitrogen which contribute to their outstanding performance.

With engine oil specifications tightening, Chevron's Group II/II+ base oils will enable lubricant marketers in Europe to meet the demanding standards and lower emissions requirements of top-tier lubricant formulations.

Multisol Group Chief Executive Paul Oliphant, said "We are very proud that Chevron has chosen Multisol as its key distributor partner in Europe. These products compliment our existing portfolio perfectly, and through our group companies, will offer lubricant blender customers an unrivalled range."

Marty Gilles, Vice President of Chevron Global Base Oils commented "Multisol's breadth of service combined with its technical experience and commitment to operational excellence, make them ideal partners for us to support the needs of regional lubricant marketers."

### **NOTES TO EDITORS**

For further information, contact: +44 (0)1270 610 444

Multisol distribute a portfolio of speciality solvents, chemicals and lubricant additives, as well as providing in-house facilities to blend, toll manufacture and package custom formulations. Operations in the United Kingdom (Irlam, Manchester), and France (Rouen) serve Western European markets, and operations in South Africa (Cape Town & Durban) supply the markets of sub-Saharan Africa.

Multisol is a partner with Pemco in a joint venture, Zenteum, which provides a drumming and logistics operation for Global leader in lubricant fuel additives Infineum, across the European, Middle East and African regions (EMEA).

Multisol was the first chemical company in the world to be certified to the International standard for integrated management systems, PAS 99; integrating the key standards of ISO 9001 (Quality), ISO 14001 (Environmental Management Systems), and OHSAS 18001 (Occupational Health & Safety). The company was also chosen to pilot the European Single Assessment Document (ESADII). More information is available at [www.multisolgroup.com](http://www.multisolgroup.com).

Chevron Corporation is one of the world's leading integrated energy companies, with subsidiaries that conduct business worldwide. The company's success is driven by the ingenuity and commitment of approximately 62,000 employees who operate across the energy spectrum. Chevron explores for, produces and transports crude oil and natural gas; refines, markets and distributes transportation fuels and other energy products; manufactures and sells petrochemical products; generates power and produces geothermal energy; provides energy efficiency solutions; and develops the energy resources of the future, including biofuels and other renewables. Chevron is based in San Ramon, California. More information is available at [www.chevron.com](http://www.chevron.com).
